

**TECHNICAL SPECIFICATION**  
**Hemoglobin Scale Book (HSB)**

1. Simple device for estimating haemoglobin.
2. The kit should consists of a booklet containing a set of six shades of red and a pack of 200 special absorbent test-strips
3. The shads represent a range of haemoglobin value from 4 to 14 g/dl. By matching the colour of a drop of blood (fresh capillary blood) on a test-strip with one of the shades of red, you can see if the blood is anaemic and, if so, the severity of anaemia in clinical terms.
4. Ideally suited for tested in the clinic.
5. Highly accurate and precise results comparable with the best laboratory methods.
6. Used by various international agencies for field survey and testing.
7. It should be CE/ISO9001 certified. It should be WHO recommended and validated by any Indian NABL approved by CAP accredited laboratory. Validation document should be submitted.
8. For comparison of rates the prices per unit of HSB with a pack of 200 special absorbent test-strips and prices per pack of 200 absorbent test-strips shall be added.
