Sub: 12 Additional diagnostic tests to be provided free at DH/SDH/SH and 09 tests at CHCs under MNJJ

As you are all aware, Mukhyamantri Nishulk Janch Yojana was implemented in a phased manner with effect from 7th April, 2013 across the state as another major step towards health for all. The laboratories and Radiology department at the healthcare institutions were strengthened in terms of manpower, infrastructure, equipments and availability of reagents and consumables was ensured to provide essential diagnostic tests free of cost. Currently the District Hospitals/Sub-divisional hospitals and Satellite hospitals are providing 44 and CHCs 28 investigations respectively to patients visiting these institutions for treatment.

However, it was felt that to further increase access and quality healthcare few more tests could be provisioned for, using the available equipments with a bare minimal extra cost of reagents. As recommended by the committee of subject experts **12 additional tests are to be provided free of cost at the DH/SDH and SH and 9 tests for at the CHCs (lists enclosed)**. Kindly ensure that these tests are provided free of cost with effect from 2nd October, 2013 after ensuring availability of all requisite reagents and consumables.

Encl: As above

(Gayatri Rathore)
Secretary (M&H)
