Ref. No.:- F.02(124)/RMSCL/Proc./S&S(MD)/NIB-08/2022/ 748

Dated: 23/09/2022

### Corrigendum-III

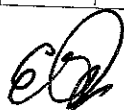

**Subject:** - Date extension, amendment in bid conditions and technical specifications in NIB-08/2022

**Ref.:-** F.02 (124)/RMSCL/Proc./S&S(MD)/NIB-08/2022/651 Dated: 29.08.2022

(Technical bid opening due on dated -30.09.2022)

The following amendments are made in bid conditions and technical specifications of NIB-08/2022

S. No	Item code	Existing Date / Conditions / specifications	Item code	Amended Date / Conditions / specifications												
1.		<table border="1"> <tr> <td>Last date and time of submission of online bids</td> <td>29.09.2022 up to 06:00 PM</td> </tr> <tr> <td>EMD, Tender fees, RISL fees through challan and Physically</td> <td>29.09.2022 up to 06:00 PM</td> </tr> <tr> <td>Date and time of opening of Online technical bids</td> <td>30.09.2022 at 11:00 AM</td> </tr> </table>	Last date and time of submission of online bids	29.09.2022 up to 06:00 PM	EMD, Tender fees, RISL fees through challan and Physically	29.09.2022 up to 06:00 PM	Date and time of opening of Online technical bids	30.09.2022 at 11:00 AM		<table border="1"> <tr> <td>Last date and time of submission of online bids</td> <td>10.10.2022 up to 6:00 PM</td> </tr> <tr> <td>EMD, Tender fees, RISL fees through challan and Physically</td> <td>10.10.2022 up to 06:00 PM</td> </tr> <tr> <td>Date and time of opening of Online technical bids</td> <td>11.10.2022 up to 2:00 PM</td> </tr> </table>	Last date and time of submission of online bids	10.10.2022 up to 6:00 PM	EMD, Tender fees, RISL fees through challan and Physically	10.10.2022 up to 06:00 PM	Date and time of opening of Online technical bids	11.10.2022 up to 2:00 PM

Should be US FDA/ European CE Certified.</p>	<p>NE32B</p>
<p><b>Annexure – VIII</b> Dockable red cell filter</p> <p>1. The predeposit storage leucodepletion filter for the leucodepletion of packed red blood cells.</p> <p>2. Filtration of whole blood and red cells must be completed for &gt;90% of bags within 45 minutes from time at which flow of blood into the filter is opened.</p> <p>3. The filter should be able to reduce the final count of leucocyte in the product to <math>&lt;5 \times 10^6</math> per bag.</p> <p>4. The filtration process should not reduce red cell to less than 85% of the initial red cell mass percentage of haemolysis <math>&lt;1\%</math>.</p> <p>5. Usable for RBC blood of core temperature in the range <math>20^\circ\text{C}</math>-<math>24^\circ\text{C}</math>.</p> <p>6. Filter material should be highly porous polyurethane/polyester material to ensure quality of red cell during filtration.</p> <p>7. Filter should have a Pre filter 200micro meter to ensure two step filtration of blood. (Optional)</p> <p>8. Filter housing: Material should be polycarbonated / PVC soft housing with housing volume of max 40ml.</p> <p>9. Bag should be sterilized by Beta irradiation or ETO or gamma sterilization</p>	<p>NE37</p>	<p><b>Annexure – VIII</b> Dockable red cell filter</p> <p>1. The predeposit storage leucodepletion filter for the leucodepletion of whole blood packed cells.</p> <p>2. Filtration of whole blood and red cells must be completed for &gt;90% of bags within 45 minutes from time at which flow of blood into the filter is opened.</p> <p>3. The filter should be able to reduce the final count of leucocyte in the product to <math>&lt;5 \times 10^6</math> per bag.</p> <p>4. The filtration process should not reduce red cell to less than 85% of the initial red cell mass percentage of haemolysis <math>&lt;1\%</math>.</p> <p>5. Usable with blood of core temperature in the range <math>4^\circ\text{C}</math>-<math>30^\circ\text{C}</math>.</p> <p>6. Filter material should be highly porous polyurethane/polyester material to ensure quality of red cell during filtration.</p> <p>7. Filter should have a Pre filter 200micro meter to ensure two step filtration of blood.</p> <p>8. Filter housing: Material should be polycarbonated with housing volume of max 40ml.</p> <p>9. Bag should be sterilized by Beta irradiation.</p>	<p>NE37</p>

<p>10. The device should have drip chamber with by pass and one way valve to remove air inside the bag.</p> <p>11. Transfer bag should be attached and have minimum 300ml capacity.</p> <p>12. Each Dockable filter should be in a separate casing to maintain integrity and shape of the filters.</p> <p>13. Market standing of more than 4 years.</p> <p>14. Should have expiry of more than 18 months at the time of supply.</p> <p>Product labels should barcoded as per ISBT128. Secondary packing and shipping cartoons should be barcoded as per GSI-28.</p>	<p>10. The device should have drip chamber with by pass or integrated air vent to remove air inside the bag.</p> <p>11.
